

Summertime Fun and Learning at The Goddard School®

Call today for a complete summer calendar!

Amazing Animals is the summer program for all budding adventurers - children who want to explore the big, wide world of animals! Explorers march in an animal parade, discover the arctic, visit a farm, and even take a trip into the forest! They'll make a quick stop at 'home' to learn about pets, and then they are off to study tiny, creepy crawlers. Children will also participate in a Dinosaur Stomp and an investigation of zany zoo pals.

The **Amazing Animals** calendar also includes special visitors and cultural events throughout the summer. Visitors provide exciting learning opportunities in a safe environment, and include community helpers; performances by storytellers, musicians, and magicians; as well as outreach programs through local museums.
