

# Summertime Fun and Learning at The Goddard School®

## Call today for a complete summer calendar!

**Let's Go Exploring!** is the summer program for all budding naturalists - children who want to explore the big, wide world! Summer explorers investigate all sorts of phenomena through this program - from the bright lights of the big city to the twinkling stars of outer space. Children will learn about locomotives, plant a garden, and even do a little camping - they'll 'travel' to the beach, the farm, and the North Pole, too.

The **Let's Go Exploring!** calendar also includes special visitors and cultural events throughout the summer. Visitors provide exciting learning opportunities in a safe environment, and include community helpers; performances by storytellers, musicians, and magicians; as well as outreach programs through local museums.

### ARTS & CRAFTS
