

Summertime Fun and Learning at The Goddard School®

Call today for a complete summer calendar!

The Goddard School® summer program offers a safe and nurturing program. Each school develops a unique learning experience for the children in their neighborhood. Teachers provide a stimulating experience for children - full of age-appropriate activities and oodles of fun based on the *Goddard Developmental Guidelines*.

The Goddard School® summer calendar includes special visitors and cultural events throughout the summer. Visitors provide exciting learning opportunities in a safe environment, and include community helpers; performances by storytellers, musicians, and magicians; as well as outreach programs through local museums.

ARTS & CRAFTS is a learning element that provides children the opportunity to stretch their creativity and work with their hands to make special summer memories.

MUSIC & MOVEMENT may be one of the most exciting features of Goddard's summer program. Everyone is having fun, and they're learning rhythm and tempo.

COOKING incorporates a creative ingredient into the learning process. Children make Bug Sandwiches for a Friendship Picnic, and in the process they learn to measure, make decisions, and work together.

LITERATURE & LANGUAGE may be the most compatible school year component. Children explore poetry, prose, creative writing, and storytelling.

SCIENCE & NATURE is a natural component of the summer program. From nature walks to experiments, observations, and investigations, children expand their cognitive skills.

COMPUTERS & TECHNOLOGY are part of each child's everyday schedule. Goddard's summer program promotes dexterity and familiarity with this universal tool in a safe environment.

SPORTS & GAMES is a vital aspect of Goddard's commitment to children's fitness and nutrition. Children participate in Scavenger Hunts, Sprinkler Fun, and Obstacle Courses.

DRAMA stretches imaginations, plays with role models, and expands each learning opportunity.
