

Summertime Fun and Learning at The Goddard School®

Call today for a complete summer calendar!

From gardening to farming to erupting volcanoes, it's so much fun to learn about **The Great Outdoors!** Young “campers” will be exposed to nature and its beauty through this authentic “camp” experience. From what grows outdoors to what lives in nature, children will learn that the outdoors is up, down, and all around!

The Great Outdoors calendar also includes special visitors and cultural events throughout the summer. Visitors provide exciting learning opportunities in a safe environment, and include community helpers; performances by storytellers, musicians, and magicians; as well as outreach programs through local museums.
